IN THE SPECIFICATION:

Please amend the Specification as follows.

Please insert the following paragraph on page 1, line 5 of the Specification:

The instant application claims priority to PCT Application No. PCT/IB2002/002841, filed on July 19, 2002. The disclosure of the prior application is hereby incorporated by reference herein in its entirety.

Please insert the following amended abstract at the end of the claims, on a new sheet:

ABSTRACT

~~The present invention proposes a~~ A method and a system for informing a lawful interception system of ~~the~~ a serving system serving an intercepted target (MS) roaming within a communication network system~~;~~. ~~the~~ The communication network system ~~comprising~~ comprises at least one serving system, where each serving system ~~comprising~~ comprises at least one serving system node (SGSN) serving the intercepted target for communication~~, the method comprising the steps of:~~. ~~first detecting a~~ A serving system node change request ~~(1.)~~ is detected from the intercepted target (MS) towards a new serving system node which is currently not serving the target~~;~~. ~~first processing said~~ The serving system node change request is processed at ~~said~~ the new serving system node currently not serving the target~~;~~. ~~wherein said~~ The processing comprises the inclusion, to

the request, of a serving system address of the new serving system node currently not

serving the target, and ~~first~~ forwarding ~~said~~ the processed request ~~(2.)~~ to an old serving

system node currently serving the target. ~~Also, the present invention proposes a serving~~

~~system node adapted to be used in such a method.~~
